

Screening Consent Form

The first 5 years of life set the stage for success in school and for a lifetime.

The Ages and stages Questionnaire-3 (ASQ-3) is a screening tool that asks questions about your child's overall social and emotional development, looking at how children are doing in the important areas of communication, physical ability, social skills, and problem-solving skills.

This screening tool can help identify your child's strengths, as well as any areas where your child may need support. The screening should take about 10-20 minutes to answer questions about your child.

Your individual information is protected to ensure confidentiality. Information is entered on a web-based database that is secure and password protected. Identifying information from the screen will be seen only by the teacher and developmental screening specialist, who scores your screening and provided the results to you.

General information about the ages and results of children's screening scores are compiled at the Macomb intermediate School District in order to better understand the strengths and challenges of the children living in Macomb County.

I have read the above description and give Great Start Macomb and St. Paul's Lutheran Church Early Childhood Center consent to screen my child(ren).

----- Yes, I do wish to participate

-----No, I do not wish to participate
